

## trimethylamine monooxygenase

Cat. No. EXWM-0748

Lot. No. (See product label)

### Introduction

**Description** A flavoprotein. The bacterial enzyme enables bacteria to use trimethylamine as the sole source of carbon and energy. The mammalian enzyme is involved in detoxification of trimethylamine. Mutations in the human enzyme cause the inheritable disease known as trimethylaminuria (fish odor syndrome).

**Synonyms** flavin-containing monooxygenase 3; FMO3; tmm (gene name)

### Product Information

**Form** Liquid or lyophilized powder

**EC Number** EC 1.14.13.148

**Reaction**  $\text{N,N,N-trimethylamine} + \text{NADPH} + \text{H}^+ + \text{O}_2 = \text{N,N,N-trimethylamine N-oxide} + \text{NADP}^+ + \text{H}_2\text{O}$

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
