

## thiamine phosphate phosphatase

Cat. No. EXWM-3609

Lot. No. (See product label)

### Introduction

**Description** The enzyme participates in the thiamine biosynthesis pathway in eukaryotes and a few prokaryotes. These organisms lack EC 2.7.4.16, thiamine-phosphate kinase, and need to convert thiamine phosphate to thiamine diphosphate, the active form of the vitamin, by first removing the phosphate group, followed by diphosphorylation by EC 2.7.6.2, thiamine diphosphokinase.

### Product Information

**Form** Liquid or lyophilized powder

**EC Number** EC 3.1.3.100

**Reaction** thiamine phosphate + H<sub>2</sub>O = thiamine + phosphate

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
