

## coagulation factor IXa

Cat. No. EXWM-4122

Lot. No. (See product label)

### Introduction

**Description** A chymotrypsin homologue, and one of the γ-carboxyglutamic acid-containing blood coagulation factors. The proenzyme factor IX is activated by factor XIa. In peptidase family S1 (trypsin family)

**Synonyms** activated Christmas factor; blood-coagulation factor IXa; activated blood-coagulation factor IX; autoprothrombin II; blood platelet cofactor II; activated blood coagulation factor XI

### Product Information

**Form** Liquid or lyophilized powder

**EC Number** EC 3.4.21.22

**CAS No.** 37316-87-3

**Reaction** Selective cleavage of Arg-Ile bond in factor X to form factor Xa

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
