

RNA helicase

Cat. No. EXWM-4703

Lot. No. (See product label)

Introduction

Description RNA helicases utilize the energy from ATP hydrolysis to unwind RNA. Some of them unwind RNA with a 3' to 5' polarity, other show 5' to 3' polarity. Some helicases unwind DNA as well as RNA. May be identical with EC 3.6.4.12 (DNA helicase).

Product Information

Form Liquid or lyophilized powder

EC Number EC 3.6.4.13

Reaction $ATP + H_2O = ADP + \text{phosphate}$

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
