

microtubule-severing ATPase

Cat. No. EXWM-4705

Lot. No. (See product label)

Introduction

Description Another member of the AAA-ATPase family, active in splitting microtubules into tubulin dimers in the centrosome.

Product Information

Form Liquid or lyophilized powder

EC Number EC 3.6.4.3

Reaction $\text{ATP} + \text{H}_2\text{O} = \text{ADP} + \text{phosphate}$

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
