

cyclooctat-9-en-7-ol synthase

Cat. No. EXWM-5160

Lot. No. (See product label)

Introduction

Description Requires Mg²⁺. Isolated from the bacterium *Streptomyces melanosporofaciens*, where it is part of the biosynthesis of cyclooctatin, a potent inhibitor of lysophospholipase.

Synonyms cetB2

Product Information

Form Liquid or lyophilized powder

EC Number EC 4.2.3.146

Reaction geranylgeranyl diphosphate + H₂O = cyclooctat-9-en-7-ol + diphosphate

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
