

Huperzia Serrata Extract (Standard)

Cat. No. EXTW-007

Lot. No. (See product label)

Introduction

Description Huperzia serrata is luxuriant plants, it has the total of eight varieties of medicinal plants in China. China is the biggest wild sugihara. Middle extract from the plants Huperzia serrata is the treatment of senile dementia, specific drug that can improve people's.

Applications Huperzine A has potent pharmacological effects and particularly since long-term safety has not been determined, it should only be used with medical supervision. It may have some effectiveness in Alzheimer's disease and age-related memory impairment. It has been used to treat fever and some inflammatory disorders, but there is no credible scientific evidence to support these uses.

Product Information

CAS No. 120786-18-7

Molecular Formula C₁₅H₁₈N₂O

Molecular Weight 242.316

Purity 1.0%, 5.0% Huperzine A HPLC

Function Indications: Memory Improvement
