

## Bovine Collagen Type II

Cat. No. NATE-4924

Lot. No. (See product label)

### Introduction

**Description** Bovine Collagen Type II (Nasal Cartilage) is one of a family of proteins found particularly in the flesh and connective tissues of mammals (approximately one-third of the body's total protein). Over two dozen types of collagen have been described; Type II is found predominantly in hyaline cartilage (50% of the protein in hyaline is collagen type II) and is also found in the vitreous humor of the eye.

**Applications** Bovine Collagen Type II can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.

**Synonyms** Type II collagen, collagen 2, bovine collagen, collagen protein Type II, bovine collagen Type II protein

### Product Information

**Source** Bovine

**Form** Liquid (sterile filtered)

### Storage and Shipping Information

**Storage** Store vial at 4° C prior to opening. Bovine Collagen Type II (Nasal Cartilage) is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use.
