

Benzoin Essential Oil

Cat. No. EXTZ-388

Lot. No. (See product label)

Introduction

Description Benzoin essential oil is a warming remedy, traditionally used in eastern medicine. As a natural decongestant, benzoin oil can help open up airways and allow easier breathing in the face of cold and flu symptoms. Benzoin's aromatic properties allow it to mask unpleasant odours, whilst its stimulating, circulation-boosting abilities help keep us warm in colder months. Botanical Name: *Styrax Benzoe*
