

Topoisomerase IV from *Streptococcus pneumoniae*, Recombinant

Cat. No. NATE-3207

Lot. No. (See product label)

Introduction

Description Topo IV (from *Streptococcus pneumoniae*) is prepared by overexpressing the subunits in *E. coli*. The topo IV is supplied as a heterotetramer complex in Dilution buffer. It is supplied with 5X concentrated Assay Buffer and Dilution buffers

Product Information

Species *S. pneumoniae*

Source *E. coli*

Form Liquid

EC Number EC 5.99.1.

Purity >95%

Activity 5 U/μl

Storage and Shipping Information

Storage at -80°C
