

Native Bacillus Subtilis Protease

Cat. No. CEFX-057

Lot. No. (See product label)

Introduction

Description Bacillus subtilis protease is an extracellular alkaline protease secreted by bacteria of the genus Bacillus and belongs to the class of serine protein hydrolases. It catalyzes the hydrolysis of proteins to amino acids and synthesizes polypeptides in organic solvents. These alkaline proteases have important application value and are widely used in detergent, tanning and silk industries.

Product Information

Source Bacillus Subtilis

Form Powder

EC Number EC 3.4.21.62

CAS No. 9014-01-1

Activity 200,000 u/g
