

Blood Peptide

Cat. No. CEFP-001

Lot. No. (See product label)

Introduction

Description Animal blood protein peptides are a class of biologically active substances obtained from fresh animal blood through anticoagulation, centrifugation, enzymatic digestion, activity identification, and isolation and purification. Animal blood protein peptide not only has good nutritional properties, can provide highly absorbable peptide compounds, but also has excellent physiological functions, is a very promising functional food raw materials.

Applications It is characterized by good palatability, fast digestion and absorption, high added value, good solubility, low viscosity, anti-gel formation, etc., and can be used as raw materials for food additives, active ingredients in cosmetics, and so on.

Product Information

Source	Animal blood
Appearance	Off-white powder
Molecular Weight	<1000 Da
Purity	90%
pH Stability	pH 2.0-10.0
Optimum pH	5.5-6.5
Solubility	Water-soluble

Usage and Packaging

Package 1kg, 5kg, 10kg aluminum foil vacuum bag; or 20kg, 25kg Fiber Drum

Storage and Shipping Information

Storage Store in a cool, ventilated and dry place, avoid direct sunlight.
