

Acetyl Tetrapeptide-2

Cat. No. CECP-017

Lot. No. (See product label)

Introduction

Description Collagen Elastin Peptide is a tetrapeptide that can target DEJ hemi-bridging particles to form collagen COL17A1 has a certain promotion effect. Meanwhile, it can effectively promote collagen levels and elastic fibers, promote the binding of cells to the ECM, counteract the adverse effects that lead to the loss of skin firmness and adhesion, improve skin cohesion and firmness, and enhance the overall elasticity of the skin.

Applications Acetyl Tetrapeptide-2 can upregulate the gene expression of COL17A1, which has certain anti-aging and repairing effects. Acetyl Tetrapeptide-2 can effectively promote the relative expression of type I collagen gene. Acetyl Tetrapeptide-2 can be used in face and neck anti-aging products to promote collagen regeneration and improve skin elasticity in the long run.

Product Information

Appearance Clarified clear liquid

Form Liquid

CAS No. 757942-88-4

pH Stability 3.0-5.0

Usage and Packaging

Package 1kg/bottle

Storage and Shipping Information

Storage Keep sealed, shaded and cool.
