

Lactic acid (Feed grade)

Cat. No. EXTZ-515

Lot. No. (See product label)

Introduction

Description Lactic acid, a natural organic acid, can regulate the pH levels in the gastrointestinal tract and promote the digestion and absorption of nutrients, particularly in the feed for young animals. Its acidic properties can inhibit the growth of molds and bacteria in the feed, extending the shelf life of the feed and maintaining its freshness. It is widely used in the animal feed industry to improve animal health and growth performance.
