

Elisabethella Lysate

Cat. No. BPEL-010

Lot. No. (See product label)

Introduction

Description This product is a phage complex preparation specially designed for Elisobacteria, which is composed of several strains of potent phages with wide lysis spectrum and high quality probiotics. The lysis rate of single phage is >70%, and the lysis rate of compound phage is >95%. It is highly effective in the prevention and control of Elisobacteria, with obvious effect. Product functions. 1. Highly effective in killing Elisabethella and its bioflocs in the water body. 2. Preventing and controlling the disease and cataract caused by Elisabethella spp. 3. Bacterial supplementation to balance the water flora and promote digestion and absorption of frogs. 4. Improve feed absorption and conversion rate, reduce feed ratio. 5. Improve the growth rate and survival rate of breeding animals at the seedling and adult stages. Main ingredients: Elisabethella phage, Bacillus licheniformis
