

Desmopressin Acetate

Cat. No. CEPP-015

Lot. No. (See product label)

Introduction

Description Desmopressin Acetate is a synthetic analog of the naturally occurring hormone vasopressin, also known as antidiuretic hormone (ADH). It is primarily used to treat conditions related to insufficient ADH, including diabetes insipidus and bleeding disorders such as hemophilia A and von Willebrand disease.

Product Information

Appearance White or off-white powder

CAS No. 16679-58-6

Molecular Formula C₄₆H₆₄N₁₄O₁₂S₂

Molecular Weight 1069.22 g/mol

Usage and Packaging

Package 1G/Bottle, 10G/Bottle, 50G/Bottle or at customers requirement.

Storage and Shipping Information

Storage 2~8°C
