

## Oligo- $\alpha$ -1,6-Glucosidase 13A from *Bacillus cereus*, Recombinant

Cat. No. NATE-1446

Lot. No. (See product label)

### Introduction

**Description** Sucrase-isomaltase is a glucosidase enzyme located in on the brush border of the small intestine with system name oligosaccharide 6-alpha-glucohydrolase. Sucrase-isomaltase is a type II transmembrane glycoprotein located in the brush border of the small intestine. It has preferential expression in the apical membranes of enterocytes. The enzyme's purpose is to digest dietary carbohydrates such as starch, glucose, and isomaltose. By further processing the broken-down products, energy in the form of ATP can be generated.

**Synonyms** EC 3.2.1.10; oligo-1,6-glucosidase; limit dextrinase; isomaltase; exo-oligo-1,6-glucosidase; dextrin 6alpha-glucohydrolase; alpha-limit dextrinase; dextrin 6-glucohydrolase; oligosaccharide alpha-1,6-glucohydrolase; Sucrase-isomaltase

### Product Information

<b>Species</b>	Bacillus cereus
<b>Source</b>	E. coli
<b>Form</b>	35 mM NaHepes buffer, pH 7.5, 750 mM NaCl, 200 mM imidazol, 3.5 mM CaCl <sub>2</sub> , 0.02% sodium azide and 25% (v/v) glycerol
<b>EC Number</b>	EC 3.2.1.10
<b>Molecular Weight</b>	67.8 kDa
<b>Purity</b>	>90% by SDS-PAGE
<b>Concentration</b>	1 mg/mL
<b>Optimum pH</b>	7
<b>Optimum temperature</b>	35 °C
<b>Specificity</b>	1,6- $\alpha$ -oligoglucosides

### Storage and Shipping Information

**Storage** This enzyme is shipped at room temperature but should be stored at -20 °C.
