

YK-4-279

Cat. No. CEI-1589

Lot. No. (See product label)

Introduction

Description YK-4-279 is an inhibitor of RNA Helicase A (RHA) binding to the oncogenic transcription factor EWS-FLI1

Synonyms YK 4-279

Product Information

CAS No. 1037184-44-3

Molecular Formula C₁₇H₁₃Cl₂NO₄

Chemical Name 4,7-dichloro-3-hydroxy-3-[2-(4-methoxyphenyl)-2-oxoethyl]-1H-indol-2-one

Molecular Weight 366.2

Purity 0.98

Targets RHA

Solubility Soluble in DMSO > 10 mM

Storage and Shipping Information

Storage Store at -20°C

Shipping Conditions Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
