

2,2'-Azino-bis(3-ethylbenzothiazoline-6-sulfonic acid)

Cat. No. CSUB-0640

Lot. No. (See product label)

Introduction

Description 2,2'-Azino-bis(3-ethylbenzothiazoline-6-sulfonic acid)-Liquid Substrate System is supplied as a ready-to-use peroxidase substrate containing 2,2'-azino-bis (3-ethylbenz-thiazoline-6-sulfonic acid) in an acidic buffer. The substrate should be colorless prior to reaction with peroxidase. It will develop a blue-green reaction product when reacted with peroxidase in microwell applications (e.g. ELISA assays). For end-point assays, 1% sodium dodecyl sulfate (SDS) may be used to stop the reaction. This will also result in a blue-green end product. Since this substrate produces a soluble reaction product, it is not recommended for blotting or histochemical applications.

Applications ABTS, a peroxidase substrate suitable for use in ELISA procedures, Abs: 405 nm

Synonyms ABTS Liquid substrate system

Product Information

Form Liquid

CAS No. 30931-67-0

Molecular Formula C₁₈H₁₈N₄O₆S₄

Molecular Weight 514.62

Substrates N-Acetyl-β-D-glucosaminidase

Storage and Shipping Information

Storage Store at 4° C
