

4-Methylumbelliferyl-alpha-L-rhamnopyranoside

Cat. No. CSUB-0689

Lot. No. (See product label)

Introduction

Description 4-Methylumbelliferyl-alpha-L-rhamnopyranoside is a fluorogenic substrate for alpha-L-rhamnosidase yielding a blue fluorescent solution upon cleavage.

Applications A fluorogenic enzyme substrate

Product Information

Form Solid

CAS No. 106488-05-5

Molecular Formula C₁₆H₁₈O₇

Molecular Weight 322.31

Purity >98%

Substrates Carbonic anhydrase

Storage and Shipping Information

Storage Store at -20° C
