

8-Hydroxyquinoline-b-D-galactopyranoside

Cat. No. CSUB-0735

Lot. No. (See product label)

Introduction

Description 8-Hydroxyquinoline-b-D-galactopyranoside is a chromogenic substrate for β -D-galactosidase yielding a brown precipitate upon cleavage.

Applications A chromogenic substrate

Synonyms 8-Quinoliny- β -D-galactopyranoside

Product Information

Form Solid

CAS No. 113079-84-8

Molecular Formula C₁₅H₁₇N₁O₆

Molecular Weight 307.3

Solubility Soluble in methanol

Substrates β -glucuronidase

Storage and Shipping Information

Storage Store at -20° C
