

Arachidonoyl-AMC

Cat. No. CSUB-0752

Lot. No. (See product label)

Introduction

Description Arachidonoyl-AMC is a fluorogenic substrate for fatty acid amide hydrolase (FAAH). This substrate is the basis for a simple, selective and sensitive assay for FAAH which is amenable to high-throughput screening.

Applications A fluorogenic substrate for fatty acid amide hydrolase (FAAH)

Synonyms AAMCA

Product Information

Form Solid

CAS No. 862913-13-1

Molecular Formula C₃₀H₃₉NO₃

Molecular Weight 461.6

Substrates Kinase; ERK 2; JNK1; Cdc2

Storage and Shipping Information

Storage Store at -80° C
