

H-D-Val-Leu-Arg-AFC

Cat. No. CSUB-0819

Lot. No. (See product label)

Introduction

Description Fluorogenic substrate for kallikrein; Where AFC is 7-amido-4-trifluoromethylcoumarin; Excitation wavelength 400 nm and emission wavelength 505nm.

Applications A fluorogenic substrate for kallikrein

Product Information

Form Solid

Molecular Formula C₂₇H₃₈F₃N₇O₅

Molecular Weight 597.64

Solubility Soluble in 0.1% trifluoroacetic acid : H₂O (3:1) (1 mg/mL).

Storage and Shipping Information

Storage Store at -20° C
